

EMMANUEL KIPYEGON

Nairobi, Kenya | +254715464684

email: sang601ke@gmail.com

Career objective:

Versatile and motivated professional with a Bachelor's degree in Microprocessor Technology and Instrumentation from the University of Nairobi. Experienced in data entry, research, and CAD tools, with proficiency in Windows and Linux operating systems. Skilled in database development and maintenance (MySQL) as well as web design and micro-controller programming. Eager to leverage my diverse skill set and enthusiasm for learning in a challenging role.

Education:

The University of Nairobi, Chiromo Campus

Bachelor of Science in Microprocessor Technology and Instrumentation

Graduation Date: 22nd September 2023

(2019 - 2023)

Kemeloi Boys High School

KCSE Mean Grade: B+ (67 points)

(2015 - 2018)

Mwalo Headway Academy Primary School

KCPE Total Marks: 400/500

(2007 - 2014)

PROJECTS:

1. Led a group of five in final year to design and integrate a database and a user interface to be used in a smart trolley to help automated shopping process
2. Collaborated with a group of five to design a relational database using MySQL to help students connect their career paths with their coursework as a final year database project

Professional Experience:

Data Entry Official(June 2022)

Independent Electoral and Boundaries Commission (IEBC), Bomas of Kenya, Nairobi

- Contributed as a key team member during the June 2022 voter transfer digitization, ensuring accurate and timely data entry.
- Collaborated with a diverse team to maintain efficiency in the data entry process.

Research and Development Intern(July -September 2022)

PCs and Parts Foundation, Nairobi

- Supported the foundation's mission to create affordable and accessible computers.
- Conducted comprehensive research on material availability and cost assessment.
- Utilized CAD tools, specifically KICAD and OpenSCAD, for design and prototyping.

Skills:

- ✓ Data Entry
- ✓ 3D modelling using OpensCAD
- ✓ Windows and Linux Operating Systems
- ✓ Database Development and Maintenance (MySQL)
- ✓ Web Design and Front-end Development (HTML, CSS)
- ✓ PCB design using KiCAD
- ✓ Basic familiarity with GNU Octave
- ✓ Basic familiarity with Micro-controller Programming
- ✓ Problem Solving and Troubleshooting
- ✓ proficient in MS office.
